# INTERNATIONAL PETROLEUM ABSTRACTS

INCORPORATING

# OFFSHORE ABSTRACTS

***International Petroleum Abstracts incorporating Offshore Abstracts*** provides an extensive review of the onshore/offshore oil and gas industry. Literature concerning oil and gas exploration and development, petroleum refining and products, economics, and offshore technology is covered. This selective compilation includes geology, geophysics, drilling, production, transport, refinery processes, analysis and testing, gas, oil, and bitumen.

Material relating specifically to all those involved in, or manufacturing for the offshore oil and gas industry is presented. Topics such as structural engineering, maintenance, underwater equipment, metallurgical research, corrosion and cathodic protection, batteries, turbines, arctic environment, health and safety are included.

This information is abstracted from a world-wide coverage of scientific and technical journals, conference papers, research reports, trade literature, standards and patents. The abstracts, which are indicative and partially informative, provide a comprehensive information service, which in combination with online access to the database via the Pergamon Orbit host, provides a key to all aspects of the petroleum industry.

Each volume lists the periodicals regularly scanned, together with detailed subject and author indexes.

**EDITOR** Gretchen E. Taylor

**ABSTRACTORS** E. G. Hancock
N. J. H. Small
G. E. Taylor

Published by John Wiley & Sons, Ltd on behalf of **The Institute of Petroleum,** 61 New Cavendish Street, London W1M 8AR.

# Subject Index to Volume 19

**Absorption and Adsorption**
alkanes from iso-octane solution *653*
flue-gas denitrification *1626*
**Additives**
alkylleads *1219*
boundry lubricant additives *726*
cyclic disulphides *741*
detergent additives *1715*
extreme pressure additives *237*
heterocyclic compounds *743*
hydrodynamic lubricant *255*
metallic dialkyl and diaryldithiophosphates *1218*
metalworking fluids *258, 1222*
microbiocides *742*
molybdenum disulphide *744*
molybdenum dithiophosphate *740*
organic phosphate esters *1221*
potassium borate *1714*
sulphonates in greases *1200*
zinc dithiophosphates *1696*
**Alkylation**
alkanes *1641*
ethanol-water azeotrope drying *1144*
ethylene in sulphuric *1142*
hydrogen fluoride—accidental release *201*
optimal solvents *1143*
phenol *661, 662*
toluene with methanol *200*
**Analysis**
aniline point of petroleum products *1174*
Brent and Ninian fields assay *1655*
B.S. *1172–1174*
diesel fuel operability *1176*
distillation characteristics of petroleum products *1172*
fluorimetry *307*
gas chromatography *221, 1177, 1656*
IP standard methods *1175*
i.r. spectrometry *310, 1178*
light scattering *1171*
neutron diffusion *1171*
semimicro colour indicator titration *1173*
slim-tube—miscibility tests *1179*
spectrometry *220, 310, 1177, 1178*
used engine oils *1400*
vacuum distillates *1178*
viscometry *1180*
x-ray *1171*
**Asphalt**
asphaltene precipitation *739*
Athabasca tar sand *257, 1215, 1709*
bitumen *736, 738, 1215–1217, 1635, 1709–1711, 1713*
bitumen hydrocracker *1711*
bitumen safety code *738*
bitumen—viscosity prediction *1713*
$CO_2$ solubility in tar sand *1215*
cold separation of bitumen from tar sands *1710*
gas-saturated density *736*
paving grade bitumens *1216*
pitch oxidation *737*
reaction kinetics *1660*
tar sand upgrading *1708, 1710*
upgrading bitumen feedstocks *1635*
viscosity of diluted bitumen *1217*
**Australia**
Carnarvon Basin *961*
declining crude production—effects *446*
freight transport and energy policy *453*
fuel substitution tax model *445*
offshore development *262, 759, 760, 1229–1231, 1233, 1234*
production chart—Western Australia *1229*
Queensland pipeline network *620*
**Automotive Engines**
CNG vehicles *1401*
diesel engines *437*
dual fuel direct injection *1184*
piston ring wear measurement *437*
pivoted-follower valve wear *1399*
swirl-chamber diesel engines *1670*
turbulent combustion *1903*
wear *1399*
**Bearings**

oil policy *455*

**Industrial Hygiene**
microbiological risk assessments for COSHH *434*

**Isomerization**
butene isomerization to measure solid catalyst activity *204*
butenes *204*
metathesis process *1159*
paraffins *1642*
propylene from ethylene and butene *1159*

**Legislation**
CERCLA *1424*
clean-air legislation *1663*
EEC regulations *1421*
natural resource damage assessment regulations *1424*
Norwegian CS health and safety legislation *1423*
US Oil Pollution Act *1425*

**LPG**
distribution *1613*
industrial growth *441*
mathematical modelling of tanks *169*
mounded tanks *638*
pipeline construction *148*

**Lubricants**
additives *237, 255, 258, 726, 740–745, 1200, 1218, 1220–1223, 1696, 1714, 1715*
aerospace applications *730*
alkylbenzenes *251*
aluminium complex grease *246*
automatic transmission fluids *716*
automotive crankcase oils *700*
automotive gear oils *700, 719, 720, 1687*
automotive service greases *238*
aviation turbine fuel lubricity *1695*
ball burnishing *699*
boric acid *1703, 1704*
boundary lubricant additives *726*
boundary lubrication evaluation *712, 1193*
chlorinated compounds *745*
chlorofluorocarbons *727*
cutting fluid evaluation *708, 1690*
cutting fluids—particulate contamination *1690*
diesel engine pistols deposits *1688, 1689*
elastohydrodynamic *1683*
engine oils *220, 714*
European market *1685*
fenographic analysis *720*
film thickness measurements *1688*
friction modifier *744, 1223*
friction tests *707*
frictional torque of sealing lips *724*
graphite *1205, 1206*
grease flow in pipes *1692*
grease for gears *721, 725*
grease—high concentrate saponification *704*
grease industry of USSR—review *701*
grease lubrication—helicopter gears *721*
grease manufacture *704, 709, 1686*
grease penetrometer *247*
grease research *702*
grease—rheological model *703*
helical gear teeth *723*
hot strip mill upgrading *250*
hydraulic fluids *251, 729*
hydrodynamic additives *255*
industrial standard—automotive greases *238*
ion-assisted deposition *1209*
linear paraffins *706*
liquid *242, 243*
liquid crystals—lubricity *1207*
lithium soap greases *715, 725*
locomotive traction gears *244, 1691*
metalworking fluid *236*
$MoS_2$ films in space *253*
$MoS_2$ friction modifier *744*
NLGI consistency numbers *248*
non-Newtonian *718, 1699*
oscillating roll/slide test adaptor *249*
oxazoline compound *236*
oxidation stability *700, 1656*
paper machine bearings *711*
paraffins *706, 707*
Pemex—grease plant quality control *1693*
Peruvian grease plant *709*
polymer composites *1196*
railroad diesel engine oils *245*
reciprocating elastomer seals *1204*
refrigerant gas environment *1698*
Reynold lubrication equation *705*
rock bits *713*
rockdrill grease lubrication *710*
rolling characteristics *237, 252, 255, 711*
rust preventatives for lubricating greases *248*
self-lubricating polymers *240*
silicon carbide *1208*
silicon nitride bearing components *728*
slip ratio *1700*
sodium metaphosphate *1205*
sodium metasilicate *1205*
solid lubricants *713, 1703–170*
solid lubricants for space bearings *239*
space applications *239–243*
synthetic fluid based *1201,1702*
tapping test *708*
test machine *249*
thrust bearing lubrication *705*
titanium carbide for space *254*
trackside lubricators *1694*
urea greases *1199*
used engine oils *220, 714*

valve train systems *1682, 1696*
vapour degreasing techniques *1697*
wear particle analysis *1701*
worn gear test machine *1701*

**Maintenance**
ANSI repair guidelines *1076*
drilling components *1074*
instrument scraper surveys *1076*
internal pipes *1580*
pipelines *147, 149, 151, 165, 608–611, 635, 1075–1077, 1094, 1101, 1577–1580*
ultrasonic in-service *1579*

**Measurement**
electronic measurement equipment *1080, 1584*
flow calibration *1581*
gas stream—heating value analysis *1082*
hydrostatic tank gauges *1078*
IP Code of Practice *612*
ISO emergent standard *1078*
malfunctions *1585*
meter prover truck *1583*
natural gas custody transfer *1581*
pipeline distribution systems *1585*
pipeline pressure loss *1582*
SCADA *903, 1100, 1371, 1372, 1588*
water vapour effects on gas *1587*

**Metallurgical Research**
chromium martensitic stainless steel *137, 138*
drill-collar fatigue *613*
stainless steel *137–139*

**Meters**
automatic meter reading *226, 1584*
direct measurement *1586*
distributed control systems *212*
hydrostatic tank gauges *1078*
IP Code of Practice *612*
loading gantry meters *612*
meter test laboratory—mobile *1583*

TLPs 1304, 1808–1811

TLP—stochastic response to viscous drift forces *1808*
tubular platform members *363*
vertical cylinders *323, 326, 331, 383, 390, 391, 838, 1300, 1304, 1341, 1813, 1819*
vortex shedding *1277*
wave breaker indices *1825*
wave breaking *1831*
wave-current force coefficients *842*
wave diffraction and radiation *1815*
wave diffraction around a structure *1835*
wave diffraction in channel *1305*
wave drift forces *1304*
wave force predictions *323*
wave forces on a group of cylinders *1816*
wave forces on a single cylinder *1816*
wave groping characteristics *1833*
wave-induced oscillations *1297*
wave interaction with uniform currents *1306*
wave-length *1832*
wave loading—higher order *1292*
wave propagation over porous seabed *1827*
waves—linear dispersion *1828*
waves—radiation and diffraction by submerged sphere *1303*
wave transformation *1829*
wind, wave and current data *845*

**Offshore Instruments**
hybrid recorder *1285*
multiphase fraction meter *1752*
tube data transmission *1286*

**Offshore Maintenance**
automated tool-joint inspection system *1802*
crack characterization *1287*
drillstring failure *1802*
fatigue integrity *1288*
fatigue reliability *319, 322, 1288*
flexible scrapers for platforms *837*
life expectancy assessment *320*
marine growth removal *837*
NDT *1287, 1288*
North Sea platform structural inspection *1801*
online inspection pig *1291*
pipeline repair—without divers *1289–1291*
Piper Alpha—Cullen Report *429, 430*
platforms *319–322, 371, 1288, 1801, 1803*
protective coatings *321*
reliability analysis *1801*
repair after submarine collision *873*
research and development *374*
surveying leg spuds of platform *1803*

**Offshore Metallurgical Research**
alloy fasteners *309*
aluminium alloys *290, 337*
bacterial hydrogen embrittlement *846*
chromium-molybdenum ferritic steel *334*
composites *386, 387*
copper *312, 333*
crevice corrosion *308, 336*
Cu-Ni alloys *305*
fatigue crack propagation *335*
local brittle zone *338*
Pb-Ag alloy electrodes *293*
metal embrittlement *846*
SCC *337*
potentiodynamic studies *334*
stainless steels *336, 395*
steel *304, 334–336, 338, 395, 1839*
stress analysis *361*
stress/fatigue corrosion interactions *313*
structural redundancy *386*
Taylor impact test *333*
titanium—corrosion resistance *847*
UK offshore steels research project *1839*
welded joint fatigue *411–414*

**Offshore Meteorology**
currents *332*
marine stratocumulus climatologies *1840*
metocean parameters *332, 345*
wind data analysis *332*

**Offshore Navigation**
integrated navigation/communication systems *339*

**Offshore Oceanography**
current measurements *1312, 1841*
distribution of large wave heights *851*
double peaked spectra *1310*
extremal wave statistics *852*
extreme wave height analysis *340, 851*
Frigg field measurements *344*
hindcast wave statistics *852*
loading uncertainties in extreme waves *342*
meteorological aspects *332, 345*
near-surface currents *1841*
nonlinear deep-water wind waves *343*
North East Atlantic—wave heights *1842*
ocean environment simulation *1311*
ocean modelling—PROSPER *1846*
over-water gust factors *1843*
random seas *344, 1844*
research and development *374, 426, 848*
shallow water waves—spectral parameters *1314*
standing waves in shallow water *849*
surface wave interaction *341*
US outer CS studies *848*
wave-current boundary layer flow *1313*
wave diffraction *850, 1845*
wind-driven currents *1847*
wave dynamics *419*
wave force measurements *380, 419*
wind-wave spectra *343*

**Offshore Oilfield Development**
Africa *758*
Alaska *752*
Australia–prospects *262, 759, 760, 1229–1231, 1233, 1234*
Brazil *754*
California *752*
Canada *1236*
Chukchi Sea *752*
Far East *753*
Gulf of Mexico *261, 751, 757*
Indonesia *1235*

tubular joints—elastoplastic analysis *1865*
tubular joints–flexibility *385, 1866*
tubular joints—fracture mechanics analysis *1874*
tubular joints—improved model *365*
tubular joints—stress analysis *361, 379, 1865*
tubulars—design of concentric members *377*
wave energy absorption *384*
wave load determination *367*

**Offshore Subsea Production**

basic design philosophy *1254*
BOET—subsea separation development *1750*
Don subsea development *1762*
flowlines—insulated and electrically heated *1754*
hydrate formation and control *1760*
ITFPS—integrated towed flowline-bundle production system *1763*
Kvaerner booster station *1749*
laser imaging for subsea inspection *1352*
leak detection *1757*
multiphase metering *1752*
multiphase pressure boosting *1755*
multiphase transport *1751, 1754*
North Sea developments *805, 1746–1760*
overview of Lyell field development *1759*
overview of Tordis field concept *1758*
production survey *806*
pump development *1751*
subsea completions *1254–1256*
subsea completion safety *803*
subsea drilling engineering *266*
subsea drilling/production system *884–886, 1254–1256*
subsea satellite slug catching *1753*
subsea separation and transport *1746*
subsea systems—review *1761*
Swops concept *804*
three-stroke separation and transportation system *1748*
VASPS—vertical annular separation and pumping system *1747*
vertical caisson slug catcher *1753*
Weir multiphase pump *1756*

**Offshore Terminals**

Dimlington deed *1854*
marine loading *394*

**Offshore Transport**

cargo tanks—duplex stainless steel *395*
chemical tankers *395*
emission-control systems *394*
LNG thermodynamics *881*
marine losses—crude transportation *879*
oil tankers *1877, 1878*
ship collisions—added mass *878*
ship hull structure—tanker *880*
US Coast Guard Safety Rules *395*

**Offshore Underwater Equipment**

autonomous underwater vehicles—concept model *887*
Canadian developments *396*
carbon fibre reinforced plastic for domes *407*
ceramic housings for deep submergence ROVs *403*
composite hulls *404*
deep-diving submersibles *397, 402, 406*
ocean particles—collection and observation *400*
PISCES *397*
polyethylene fibre domes *882*
Poseiden project *883*
power generators *866*
ROV-AUV hybrid *405*
ROV dynamics—system identification *399*
ROVs *396, 399, 403, 884, 888*
remotely-operated tv vehicle *888*
remote sensing *396*
side-scan sonar imaging *401*
US ocean technology survey *398*
ventilation requirements *1886*

**Offshore Valves**

emergency shutdown facilities *889, 890, 1353, 1354*

subsurface safety valves *889–891, 1353, 1354, 1886*

**Offshore Vibration**
active isolation *1359*
active/passive antivibration mount *1357*
cylindrical elements *1356*
drillstring vibrations *409*
effect on MWD pressure pulse signals *409*
in-line vortex-induced *1356*
longitudinal vibration of pipe-string *1881*
optical measurement *1358*
Timoshenko beam problem *1355*
rotating machinery system *408*

**Offshore Wave Energy**
Bristol Cylinder *384*
energy extraction device *892*
laser generation *1360*
oscillating water column devices *410, 1361*
renewable sources *893*
self-propelled backward-bent system *1882*

**Offshore Welding**
auto-regressive simulation model *415*
Charpy impact tests *413*
CTOD tests *413, 414*
distortion control *416*
fatigue studies *415, 1884*
fracture testing *413*
fusion-bonded epoxy coating defects *897*
grouted pile/sleeve connections *896*
jacket kingpost *895*
large structures—integrity *413*
local brittle zones *413*
one-pass panel bead welds *416*
plate thickness influence *412*
postweld treatment of tubulars *411*
stray current corrosion *1883*
submerged-arc-welded pipe *897*
weld-bead composite connections *894, 896*
welded joints—fatigue behaviour *412*

**Oil Loss Control**
indirect and direct loss *1894*
loss reduction proposals *1895*
management factor—insurance aspects *1896*

**OPEC**
cartel stability *938, 1922*
oil conservation policy *454*
oil pricing policies of members *1921*
question of unity *458*

**Petrochemicals**
corrosion—plant cooling system *604*
industrial growth *441*
Saudi Arabian *1926*

**Pipes and Pipelines**
Alberta expansion *1590, 1591*
Alberta rural gas programme *160*
Arkoma construction *1085*
automated mapping *628*
bifurcation buckling *1324*
blowdown calculations *159*
Canada—construction *1099*
Canada's first subsea line *1328*
cathodic protection *593, 634, 1562*
cleaning and lining *149*
close interval potential *633*
coatings *152–154, 161, 590, 591, 593, 594, 1562, 1564, 1566*
coatings for welded joints *154*
compressor efficiency *1593*
compressor stations *614, 1595–1597*
computerized techniques *145–148, 157, 162, 163*
construction activity *1604*
construction details *158*
control centre consolidation *629*
corrosion evaluation *129, 131, 132, 134, 137, 138, 634, 1568–1571*
design *624, 630, 636*
drill pipe standard *1325*
environmental aspects *1525*
Ewa project *616*
failure prevention *1589*
flexible *618, 1077, 1329*
flood problems *1599*
Forties line replacement *1326*
gas *148, 150, 156–158, 608, 609, 611, 614–622, 626–629, 631, 632, 636, 640, 1084–1087, 1089, 1091, 1093, 1096–1099, 1327, 1328, 1590, 1591, 1593, 1595–1607*
gas distribution industry—safety *1084*
ground-penetrating radar leakage pinpointing *165*
horizontal boring *1602*
hurricane emergency plans *617*
*in situ* corrosion monitoring *140*
*in situ* renovation *149, 151, 635*
inspection of flexible pipe *1329*
integrity *1589*
interconnectal system *640*
internal pipe coating *1566*
Iroquois pipeline *1603*
Kern River construction *1600*
leakage pinpointing *165, 1327*
leak-area calculations *1327*
leak clamp *1094*
leak reduction *1595, 1596*
limit load instabilities *1324*
location of buried lines *619*
long external *131*
LPG *148*
LPG distribution *1613*
Main Line 80, Utah *1086*
maintenance *147, 149, 151, 161, 608–611, 635, 1075–1077, 1094, 1101, 1577–1580*
measurement of pressure loss *1582*
multiphase pressure drop *541*
NAPCA—review
network flow problem solving *1605*
North American construction
Nova Corp. transmission loop *1097*
Nova's north lateral *156*
odorant loss—gas systems *1606*
operational risk safety *1090*
Paris gas system renovation *615*
pigging operations *155, 610, 1566*
pipeline turbines *614, 1582*
pitting corrosion *634*
pitting, stress and SCC cracking relationships *132*
polyethylene couplings *616, 1089, 1601*
pressure drop correlations *1088*
probabilistic reliability *630*
programmable logic controller *146, 1100*
pseudoplastic fluids—design correlation *624*
Queensland network expansion *620*
rehabilitating gas mains on bridges *161*
replacement project—cost reduction *1101*
rheology of Saudi crude in pipeline *166*
risk analysis—gas distribution network *1607*
St. Clair River crossing *631, 1096*
satellite communication control *145*
scheduling technique for refined products *1095*
seismic loading *164, 625–627*
seismic vulnerability *625–627*
slurry *1088*
steel—performance codes *1598*
steel—surface pretreatment *1573*
stress calculation—distribution systems *1092*
three-layer epoxy-polyolefin coatings *152*
trans-ASEAN pipeline *621*
transportation bottlenecks *1594*
US construction activity *1098*
US energy pipeline survey *632*
WaveForm analyser/pulse generator *633*
wax deposition *1592*
World Oil's 1991 tubing tables *1323*
worldwide activity outside US *1093*
worldwide construction survey *150, 622, 1091*

**Pollution**
air *462–464, 946, 947, 1430–1434, 1665, 1666, 1939, 1940*
Alyeska tactical oil spill model *1442*
Arctic environment *956, 1442*
assessment by numerical model *1440*
ATOM—oil spill model *1442*
biodegradation in soils *950, 1435–1437*
boom failure *465*
$CO_2$ emissions in nine OECD countries *1940*
coal combustion—$NO_x$ emissions *1433*
compressor station leakage *1526*
contaminant diffusion in sea *953*
deoiling drum efficiency *1438, 1439*
design for waste minimization *466*
Dow Chemical's waste reduction projects *468*
EC strategy *1432, 1433*
Energy Resources Conservation Board *19*
engine exhaust emissions *1430–1432*

environmental and human risk *951*
Exxon Valdez oil spill *1441*
global warming amelioration *464*
greenhouse-gas emissions *463*
HF vapour clouds *947*
land *948–952, 1435–1437, 1526, 1941*
management and legislative implications *1441*
metalworking fluids—waste treatment *1945*
methane impact on climate *946*
natural recovery of cold water marine sites *955*
nitrous oxide abatement *1434*
on-site bioremediation *949*
pipelines *1526*
plastic waste recycling *467*
pollutant input chronology *1443*
Prince William Sound *956*
recycling of backfill *1943*
refinery sludge *1435, 1445, 1447–1449*
re-refining used oil *1944*
salt water spill sites *952*
sea *419, 465, 953–958, 1440–1443, 1942*
simulation model of oil spill risk model *1942*
soil contamination *948, 950, 1435–1437, 1941*
sorbent technology *1444*
Southampton Water *1443*
Sullom Voe *1443*
sulphur emissions *462*
toxic substance tracking *1939*
under ice *807*
US Clean Air Act *941*
US environmental regulations—effect on crude oil development *942*
vacuuming tanker oil spills *954*
waste incineration *1448*
waste-management—drilling and production *957*
waste oil disposal problem *1446*
waste products control *466–468, 957, 1435, 1444–1449, 1466, 1469, 1800, 1943–1945*
waste—technological control *1449*
water *1438, 1439*
World Prodigy oil spill *1440*

**Production**
computerized well-surveillance *1889*
resource/reserves system *20*

**Properties. Chemical and Physical**
automatic transmission fluids *1654*
benzene *1166*
Brent and Ninian streams assay *1655*
enthalpy of vapourization *216*
flammability limits methane-nitrogen *1167*
methanol *214*
paraffin sediments *1168*
phase separation temperatures *219*
saturated liquid densities *1170*
sedimentation Bombay High crude *1168*
viscosity and density data *672*
viscosity and molecular weight correlation *672*
viscosity correlation *672, 1653*
viscosity of *n*-hydrocarbons and their mixtures *217*
viscosity of undersaturated crude *215*
viscosity range from one test *1169*
water-tolerance of gasoline-methanol blends *218*

**Pumps**
beam-pump computer control *1608*
bellows seal retrofit *1609*
centrifugal *167, 644, 645, 1102*
crude oil handling *1609*
efficiency improvement *646*
electrical submersible *168, 637*
field performance test *1103, 1608*
variable-frequency drive *1608*
wear mechanisms *167*

**Refineries**
automation *179, 1617*
blending control *179*
block-type valves *182*
carbon steel cracking in amine service *650*
cathodic protection *588*
cavitation prevention in pumps *645*
chromatographs *1619, 1621*
computerized control *1133*
construction resources—managing *1129*
contracts for construction *184*
corrosion control and treatment *142, 1567*
deaerator steam evaluation *1622*
digital control systems *1133*
distillation columns *652*
electrical safety code *1900*
energy conservation *1428, 1429*
European environmental policy *1936*

Brake, Germany *1105*
sulphur shipping terminal *1105*
**Thermal Cracking**
catalytic hydropyrolysis *731*
crack isobutane for isobutylene *186*
ethylene plant efficiency *1145*
*n*-hexadecane *1623*
sedimentary basin oils *1624*
**Training**
creativity stimulation *1427*
designing effective programmes *944*
employees—their importance *943*
engineers for 21st century *1938*
flexibility in management *470*
gas operations training centre *945*
hazards—identification and assessment *1937*
organizational structure changes *1426*
project managers *461*
purpose-driven organization *471*
tanker cargo handling simulator *460*
**Transport**
Dept. Transport Regulations *623*
LPG distribution *1613*
pipeline bottlnecks *1594*
refuelling natural gas vehicles *1107*
road tanker loading *639*
safety *1106*
**Tribology**
abrasive wear *1195*
acoustic emission *1194*
alumina *1189*
aluminium foil rolling *1221*
aluminium 390—wear and scuff resistance *1674*
bearings *27, 239, 282, 683–685, 688, 689, 692, 695, 697, 705, 711, 713, 718, 728, 1201, 1560, 1561*
blister generation *1203*
boric acid *1703, 1704*
carbon ring surfaces *1203*
ceramics *690, 696, 1189, 1190*
ceramics for heat engines *690*
elastohydrodynamics *684, 1188, 1683*
electrical contacts *1193*
electrochemical variables *694*
fast arrest and freeze wear test *698*
finite journal bearing *684*
flat circular thrust bearing *689*
friction coefficient *1192*
gas hydrostatic bearings *688*
gear wear test rig *1202*
high-speed steel—erosion *691*
humidity—influence of *682*
impact-abrasion testing *686*
ion implantation techniques *695, 1675*
low-impedance bearing *683*
mechanical seal faces *1673, 1678–1680*
multiple contact model *1197*
nickel aluminide alloys *697*
oil transition temperatures *1192*
rolling bearing—contamination effects *685*
scanning tunnelling microscopy *234*
seal face topography *1673*
seals in hard abrasive slurries *1678*
self-lubrication mechanisms *1196*
silicon carbide seal rings *1673*

sliding friction *697, 1675*
slip ratio effect *1700*
space tribology applications *235, 241, 243, 253, 254*
surface roughness *1188, 1191, 1194, 1197*
survey—general *1677*
test rig for seal development *1678*
thermoplastics *1684*
thin solid film lubricants *241*
transient response *692*
tribometer *1676*
unlubricated sliding friction *693*
valve train systems *1682, 1696*
water—influence of *682*
wear losses *694*
wear studies *687, 696, 1674–1677, 1681, 1698, 1701*
wire drawing *1205, 1206*

**United Kingdom**
marine science and technology *420*
oil industry in 1990 *1918*
oil industry prospects *1919*
petrol prices after Kuwait invasion *1411*
petrol prices—speed of adjustment *1923*
Wytch Farm development *18*

**United States**
Clean Air Act *941, 1663*
crude and natural gas reserves *1403*
drilling activity *442, 970, 971*
economic effect of environmental regulations *942*
energy tax incentives *1422*
farmer's gasoline/diesel fuel consumption *1187*
federal oil spill legislation *1425*
gas market in 1990 and beyond *1920*
gas prices *1402*
increase in wildcats *970*
Irene—offshore California *1721*
Monterey formation, offshore California *1733*
natural gas—difference between US and FRG *937*
natural gas market *934, 935*
ocean technology review *398*
offshore Louisiana *261, 1246*
oil import fee *442, 448*
pipeline construction *1098*
strategic petroleum reserve *931*
Texas petroleum industry *936*

**USSR**
exploration activity *17*
gas industry *940*
grease industry review *701*
Gulf crisis—effects on economy *1416*
Kazakastan basin *2*
ocean research *397*
oil and energy analysis *459, 1409*
recent trends in oil and gas industry *1408*
Timano-Pechora basin *1*

**Valves**
block-type valves
in downhole completion equipment *172*

**Vibration**
axial vibration analysis *1333*
bottomhole assembly vibration *483*
centrifugal pumps *644–646*
drill collars *483*
monitoring *647*
nonlinear elastic beams—oscillations *1809*
pressure control valves *1614*
random excitations *173*
weight absorber designs *173*
whine resistants bits *481, 482*

**Welding**
coatings for pipe joints *154*
field-applied overlays *642*
tubular joints—fracture mechanics analysis *1874*
